Astropedia Textbook: Universe Revealed

Intended for all audiences, this textbook is an introduction to the nature of the universe. Use it to research or review our solar system, stars, galaxies, and the history of the universe. Each chapter has a set of corresponding homework questions.

Chapter 1 - How Science Works

- [Life on Mars](#)
- [Scientific Method](#)
- [Evidence](#)
- [Measurements](#)
- [Estimation](#)
- [Logic](#)
- [Mathematics](#)
- [Observations and Measurements](#)
- [Theories](#)
- [Errors and Statistics](#)
- [Questions Chapter 1](#)

Chapter 2 - The First Discoveries About Earth and Sky

- [Stonehenge](#)
- [Motions in the Sky](#)
- [Navigation](#)
- [Constellations and Seasons](#)
- [Dividing Time](#)
- [Solar Calendars](#)
- [Ancient Observatories](#)
- [Counting and Measurement](#)
- [Astrology](#)
- [Greek Astronomy](#)
- [Angular Size and Linear Size](#)
- [Phases of the Moon](#)
- [Eclipses](#)
- [Aristotle and Geocentric Cosmology](#)
- [Aristarchus and Heliocentric Cosmology](#)
- [The Seasons](#)
- [Arab Astronomy](#)
- [Indian Astronomy](#)
- [Chinese Astronomy](#)
- [Mayan Astronomy](#)
- [Questions Chapter 2](#)

Chapter 3 - The Copernican Revolution

- [The Trial of Galileo](#)
- [Ptolemy and the Geocentric Model](#)
- [The Renaissance](#)
- [Copernicus and the Heliocentric Model](#)
- [Tycho Brahe](#)
- [Johannes Kepler](#)
- [Kepler's Laws](#)
- [Galileo Galilei](#)
- [Isaac Newton](#)
- [Newton's Law of Gravity](#)

The Plurality of Worlds
The Layout of the Solar System
The Scale of the Solar System
The Idea of Space Exploration
Orbits
History of Space Exploration
Periodic Processes
Questions Chapter 3

Chapter 4 - Matter and Energy in the Universe

Rutherford and Atomic Structure
Early Greek Ideas
Dalton and Atoms
The Periodic Table
The Structure of the Atom
Energy
Heat and Temperature
Potential and Kinetic Energy
Conservation of Energy
Velocity of Gas Particles
States of Matter
Thermodynamics
Heat Transfer
Thermal Radiation
Wien's Law
Radiation from Planets and Stars
Internal Heat in Planets and Stars
Questions Chapter 4

Chapter 5 - The Earth-Moon System

How the Earth Cooled
Early Estimates of Earth's Age
Ages Using Radioactivity
Radioactive Half-Life
Ages of the Earth and Moon
Internal Heat and Geological Activity
Internal Structure of the Earth and Moon
Basic Rock Types
Layers of the Earth and Moon
The Evolving Earth
Earth and Moon
Plate Tectonics
Geological Processes
Geological Processes - Volcanism
Geological Processes - Erosion
Impact Craters
The Geological Timescale
Mass Extinctions
Evolution and the Cosmic Environment
Random Processes
Earth's Atmosphere and Oceans
Environmental Change on Earth
Environmental Change on Earth - Ozone
Environmental Change on Earth - Carbon Dioxide
The Earth-Moon System
Tidal Forces
Ice on the Moon
Origin of the Moon
Questions Chapter 5

Chapter 6 - The Terrestrial Planets

A Close Up View of Mars

Mercury

Mercury's Orbit

Mercury's Surface

Venus

Volcanism on Venus

Venus and the Greenhouse Effect

Tectonics on Venus

Exploring Venus

Mars

Early Studies of Mars

Modern Views of Mars

Missions to Mars

Geology of Mars

Water on Mars

Polar Caps of Mars

Climate Change on Mars

Life on Mars

The Moons of Mars

Martian Meteorites

Comparative Planetology

Incidence of Craters

Counting Statistics

Internal Heat and Geological Activity

Gravity and Atmospheres

Normal Atmospheric Composition

The Significance of Oxygen

Questions Chapter 6

Chapter 7 - The Giant Planets and Their Moons

Volcanoes on Io

The Gas Giant Planets

Atmospheres of Gas Giant Planets

Clouds and Weather on Gas Giant Planets

Internal Structure of the Gas Giant Planets

Gas Laws

The Discoveries of Uranus and Neptune

Uranus

Thermal Radiation from Gas Giant Planets

Life on Gas Giant Planets

Why Giant Planets are Giant

Ring Systems of the Giant Planets

Structure Within Ring Systems

The Origin of Ring Particles

The Roche Limit

Resonance and Harmonics

Satellite Systems of Giant Planets

Geology of Large Satellites

Jupiter's Ganymede

Jupiter's Europa

Jupiter's Callisto

Jupiter's Io

Saturn's Enceladus

Saturn's Titan

Uranus Miranda

Neptune's Triton

Is Pluto A Planet?

Questions Chapter 7

Chapter 8 - Interplanetary Bodies

The Tunguska Event

Interplanetary Bodies

Comets

Early Observations of Comets

Structure of the Comet Nucleus

Comet Chemistry

Oort Cloud and Kuiper Belt

Comet Orbits

Life Story of Comets

Meteors and Meteor Showers

Gravitational Perturbations

Asteroids

Surveys for Earth Crossing Asteroids

Gravitational Perturbations

Asteroid Shapes

Composition of Asteroids

Introduction to Meteorites

Origin of Meteorites

The Threat from Space

Probability and Impacts

Impact on Jupiter

Interplanetary Opportunity

Questions Chapter 8

Chapter 9 - How Planetary Systems Form

Safronov and Planet Formation

Formation of the Solar System

Early History of the Solar System

Conservation of Angular Momentum

Helmholtz Contraction

Collapse of the Solar Nebula

Why the Solar System Collapsed

From Planetesimals to Planets

Accretion and Solar System Bodies

The Origin of Satellites

Gradual Evolution and a Few Catastrophes

Chaos and Determinism

Extrasolar Planets

Direct Detection of Extrasolar Planets

Indirect Detection of Extrasolar Planets

The Doppler Effect

Discoveries of Extrasolar Planets

Properties of Extrasolar Planets

Future Detection of Extrasolar Planets

Questions Chapter 9

Chapter 10 - Detecting Radiation from Space

Invisible Radiation

Radiation and the Universe

The Nature of Light

The Electromagnetic Spectrum

Properties of Waves

Waves and Particles

How Radiation Travels

Properties of Electromagnetic Radiation

Thermal Spectra

The Quantum Theory

The Uncertainty Principle

Spectral Lines

~~Spectral Lines~~

Emission Lines and Bands

Absorption (& Emission) Lines and Bands

Astronomical Detection of Radiation

The Telescope

Optical Telescopes

Optical Detectors

Image Processing

Digital Information

Radio Telescopes

Telescopes in Space

Interferometry

Collecting Area and Resolution

Frontier Observatories

Questions Chapter 10

Chapter 11 - Our Sun: The Nearest Star

Kelvin and the Sun's Age

The Nearest Star

Properties of the Sun

Kirchoff's Laws

The Sun's Composition

Energy from Atomic Nuclei

Mass Energy Conversion

Examples of Mass Energy Conversion

Energy from Nuclear Fission

Energy from Nuclear Fusion

Nuclear Reactions in the Sun

The Sun's Interior

Energy Flow in the Sun

Collisions and Opacity

Solar Neutrinos

Solar Oscillations

Testing a Hypothesis

The Sun's Atmosphere

Solar Chromosphere and Corona

Sunspots

The Solar Cycle

The Solar Wind

Effects of the Sun on Earth

Energy Sources

Questions Chapter 11

Chapter 12 - Properties of Stars

Spectral Classification

Stars

Star Names

The Distance to Stars

Apparent Brightness

Absolute Brightness

Measuring Star Distances

Stellar Parallax

Spectra of Stars

Temperature and Spectral Class

Stellar Composition

Stellar Motion

Stellar Luminosity

The Size of Stars

Stefan-Boltzmann Law

Stellar Mass

Hydrostatic Equilibrium
Stellar Classification
Hertzsprung-Russell Diagram
Volume and Brightness Selected Samples
Stars of Different Sizes
Understanding the Main Sequence
Stellar Evolution
Questions Chapter 12

Chapter 13 - Star Birth and Death

Seeing the Death of a Star
Understanding Star Birth and Death
Cosmic Abundances of Elements
Star Formation
Young Stars
Mass Limits for Stars
Brown Dwarfs
Young Star Clusters
Main Sequence Stars
Nuclear Reactions in Main Sequence Stars
Main Sequence Lifetimes
Evolved Stars
Red Giants
The Creation of Heavy Elements
Variable Stars
Stellar Mass Loss
The Laws of Thermodynamics
Entropy
White Dwarfs
Supernovae
Supernova 1987A
Neutron Stars and Pulsars
Einstein's Theory of Relativity
Properties of Black Holes
Black Holes
Questions Chapter 13

Chapter 14 - The Milky Way

Herschel
The Distribution of Stars in Space
Stellar Companions
Binary Star Systems
The Incidence of Binary or Multiple Stars
Mass Transfer in Binaries
Binaries and Stellar Mass
Nova and Supernovae
Exotic Binary Systems
How Multiple Stars Form
Environments of Stars
The Interstellar Medium
Effects of Interstellar Material on Starlight
Structure of the Interstellar Medium
Dust Extinction and Reddening
Groups of Stars
Open Star Clusters
Globular Star Clusters
Distances to Groups of Stars
Ages of Groups of Stars
Layout of the Milky Way
Isotropy and Anisotropy

Questions Chapter 14

Chapter 15 - Galaxies

Shapley, Curtis, and Hubble

The Milky Way Galaxy

Mapping the Galaxy Disk

Spiral Structure in Galaxies

Mass of the Milky Way

Dark Matter in the Milky Way

Galaxy Mass

The Galactic Center

Stellar Populations

Formation of the Milky Way

Distances to Galaxies

Classifying Galaxies

Spiral Galaxies

Elliptical Galaxies

Lenticular Galaxies

Irregular Galaxies

Galaxy Structure and Oddities

The Local Group

Light Travel Time

Galaxy Size and Luminosity

Mass to Light Ratio

Dark Matter in Galaxies

The Gravity of Many Bodies

Galaxy Evolution

Galaxy Interactions

Galaxy Formation

Questions Chapter 15

Chapter 16 - The Expanding Universe

The Discovery of Quasars

Galaxy Redshifts

The Expanding Universe

Cosmological Redshifts

The Hubble Relation

Relating Redshift and Distance

Galaxy Distance Indicators

Size and Age of the Universe

The Hubble Constant

Large Scale Structure

Galaxy Clustering

Clusters of Galaxies

Overview of Large Scale Structure

Dark Matter on the Largest Scales

The Most Distant Galaxies

Black Holes in Nearby Galaxies

Active Galaxies

Quasars

Gravitational Lensing

Properties of Quasars

The Quasar Power Source

Quasars as Probes of the Universe

Questions Chapter 16

Chapter 17 - Cosmology

Discovery of the Microwave Background Radiation

Early Cosmologies

Relativity and Cosmology

The Big Bang Model

THE BIG BANG MODEL

The Cosmological Principle

Universal Expansion

Cosmic Nucleosynthesis

Cosmic Microwave Background Radiation

Measuring Space Curvature

Cosmic Evolution

Mean Cosmic Density

Critical Density

The Age of the Universe

The Fate of the Universe

Alternatives to the Big Bang Model

Space Time

Evolution of Structure

Particles and Radiation

The Very Early Universe

Mass and Energy in the Early Universe

Matter and Antimatter

The Forces of Nature

The Limits of Knowledge

Questions Chapter 17
